

4. Final task

Create a single bar chart showing the number of games per 4 specific gaming platforms (PS4, XOne, PC, and WiiU) by game genre. You have to filter data, sort it, and then plot it using the chart bar. You have an example of how it should look like:

* Hint use function `groupby` for counting. Sorting can be done by the sum of total games. It is recommended to write a program using functions.
